

## ITC Drilling School Consultants

The ITC Drilling School has been in the petroleum training business since 1987. ITC Drilling School Consultants will provide assistance in setting up petroleum training centers world wide.

We cooperate with many Norwegian companies and institutions both to develop curricula and provide trainers, for Petroleum basic training or Technical College level, also Safety training

Our main philosophy is module based training, 3-5 days modules.

### What services can we provide:

- 1) We can provide competent lecturers for training of trainers or for teaching locally. We have agreements with more than 30 trainers, with long field experience, and with several service companies, other training institutions and Universities.
- 2) We can assist in developing local curriculum for Petroleum Training: We have over a long period 1987 – 2016 developed and run training for drilling personnel on both technical college level and basic level. Partly owned by Transocean, the world's largest drilling contractor from 1990 – 2016.
  - a) Training of Sub sea engineers on Semi subs and Drillships.
  - b) Training of maritime personnel, such as Technical Manager (Technical) and Platform Manager (Maritime), together with our local maritime university. Training of Drilling Engineers.

- 3) We have performed training in many countries, like USA, France, Venezuela, Namibia, Angola, Cyprus, and Norway.
- 4) We are basing all our training on API standards.
- 5) Large accidents like Macondo in the Gulf of Mexico and incidents on the Norwegian shelf are used for training purposes.

- 6) We are also experts on the Norwegian Petroleum Law and the NORSOK standards, beyond API.

- 7) We can also assist in more practical matters:

- a) Library of Petroleum Technical books in English.
- b) Labs for drilling fluids, complete with HTHP, 2 workstations.
- c) Drilling simulator, DS 50 portable, for demo purpose.
- d) Drillbit selection and testing lab, 10 bits.
- e) Geology lab, with core and oil samples, and rock samples.
- f) Sub-sea demo parts.
- g) Tailor making of E-learning modules, based on ITC PetroTrainer.

# The Woohoo Company Team

ITC Drilling School Consultants is now a part of The Woohoo Company and is composed of a team with a wide range of knowledge and international experience. By utilizing an international corporate culture, we create an innovative and efficient environment.
